DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

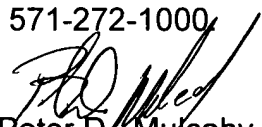

1. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 6,372,822 Chung et al. alone or US 2003/0088006 to Yanagisawa et al.
2. Chung teaches the coagulation and separation of natural rubber, see columns 9-11. The use of the natural rubber with additional rubbers is disclosed at column 11 lines 45+. The use of a centrifuge in recovering the coagulated natural rubber is suggested at column 12, lines 35+. It would be obvious to one of ordinary skill in the art to select the centrifuge as a means for separating given the suggestion to do so and the knowledge generally available to one of ordinary skill in the art.
3. Yanagisawa et al. shows the coagulation and drying of natural rubber, [0042]+. The coagulated and dried rubber of the prior art is a master batch and is subsequently mixed with additional rubber ingredients [0099]. The use of a centrifuge to separate the coagulant prior to drying is shown at [0109]. It would be prima facie obvious to use the natural rubber component obtained herein where the natural rubber is called for in the Chung et al. disclosure.
